Welcome to our forum . What update package are you using? How much memory do you have? Also visit the Autodesk website for the latest fixes. I know that we are. On this page you can find a lot of information on various software such as AutoCAD, Revit, Maya, 3ds Max, Raster Design, 3ds Max Design, etc. Please feel free to ask questions or leave feedback on other pages of this site. I also do a lot of art, architecture and design publications for Autodesk. You can also subscribe to my newsletter to receive updates. As new articles become available, I'll post them on this page.
