Easton of the Thomas & Easton Software Company, in order to provide an affordable, desktop-based solution to engineering and architectural drafting. After being introduced in 1982, AutoCAD's continued development was sponsored by 3D Systems, which paid to market and support the product. On February 16, 1994, AutoCAD was the first software application to exceed one million in sales. AutoCAD 2000's user interface was designed by John Flannery and was a departure from the previous UI, which was somewhat unfriendly to users not proficient in AutoCAD. AutoCAD 2002 was a major redesign, adopting a

AutoCAD supports a number of APIs to access the drawing data to automate tasks, most notably its TECNOS and X3D APIs. TECNOS was the original API for programming AutoCAD and was available in the 1980s. It has since been replaced by the X3D API, the successor to TECNOS. The X3D API is more powerful and supports additional languages, as well as 3D rendering. Legacy features AutoCAD LT supports a number of features that are not available in AutoCAD, such as X-Refs, CNC Drawings, and Networking. AutoCAD LT is discontinued. Its main reason for discontinuation was related to supporting Windows 7 and Windows 8 on the same computer, whereas AutoCAD 2020 and AutoCAD LT 2019 are only supported on Windows 10, meaning that the support of Windows 7 and Windows 8 has been discontinued. The second reason is the fact that the TECNOS/X3D API was discontinued after 2009, leaving only the WebDAV API and DWG Write. The major issues we had yesterday were caused by a combination of a hardware and software glitch which impacted one server. We are taking every measure to avoid such a situation happening again." The system problems affected PSN services as well as the PlayStation Store. The thread on the topic has since been locked, however all PlayStation Store and PSN games are now available to download. The official reason as to why the PSN was hit with these issues have not yet been revealed, however we suspect that it was caused by a badly written piece of code that ran through the network at the same time as another game update.
