June 08, 2016 Windows 2016 Server Update 4 Will Replace Latest Updates of Windows OS Microsoft has confirmed that Windows 2016 Server Update 4 will replace the latest updates of Windows OS and will be made available in July. According to reports Microsoft has already released Windows 2016 Server Update 3, in a bid to fix a lot of security vulnerabilities. This is the fourth major Windows Server 2016 security update, which will bring several improvements and fixes, along with some security improvements. Microsoft is planning to release the Windows Server 2016 Update 4 as a cumulative update and it will fix several issues of Windows Server OS. This will be an important update because of the massive security issues in the past few months. Microsoft has not given a clear date of the release of this update, but it will be out soon as it is a part of the Windows Server 2016 scheduled updates. Microsoft had announced an intention to launch the Windows Server 2016 Update 4 before the Windows 10 Anniversary Update. The Windows Server 2016 Update 4 will be cumulative update, so you will not lose any data by installing this update.

June 06, 2016 New Tips and Tricks for Windows 10 Has Been Available Windows 10 is most secure operating system, but it comes with some headaches. The Windows 10 is based on the 1607 version of the OS and this version is not fully developed with latest security updates. Microsoft has
