Intramuscular injection of colloid solutions. Activation of the complement system, hypotension and death. Intramuscular injection of certain substances, dilated the pulmonary artery. This dilatation was not complete but was followed by deep hypotension and death. The increased circulatory resistance was probably due to intracapillar aggregation of erythrocytes caused by the colloidal solutions used. Aggregates were observed in the capillaries and apparently were not left behind in the fastigium. The aggregates exceeded the diameter of endothelium-free capillaries in diameter. The aggregates caused by colloid solutions would enhance the embolism of erythrocytes. The pulmonary arterial occlusion and the embolism of erythrocytes were followed by severe intravascular haemolysis and pancytopenia. Signs of cardiac ischaemia and myocardial cell necrosis were also found. The myocardium in these animals showed also signs of haemorrhage. A high level of platelets was found in the blood of the animals. A causal connection between the increased platelet counts and haemorrhage in the myocardium could not be established. I tend to shy away from any RPG that doesn't include a solid story. So when I saw that the developers (US Concepts) of the Legend of the Elden Ring had managed to give the game a compelling plot, I was very pleased. Some of the most enjoyable action RPGs that I've played have been the ones that have a great story that the player is able to read along to. In the story of Legend of the Elden Ring, the player will be playing as Tarnished, a swordsman who has been banished from the country of Elden due to a crime they committed. When a vision of a beautiful girl named Allura appears before them, it is clear that the gods want Tarnished to return to the country, if only so that they may do the bidding of the Allura. The plot gets very interesting once the player has decided to venture into the vast and rich world of the Lands Between. I found it interesting that a new element has been added to the RPG genre, the ability to send forth a companion to assist in battle in the form of a pet. It seems like a unique idea to have a companion that can be controlled by the player while not having to stop and take a break from the action. The companion can be changed into its alternate form at will, without having to change weapons, so it is easy to switch between the two during the heat of battle. As the characters adventure across the land, they are able to explore a variety of different areas and dungeons. Although the enemies within are quite strong, you can expect to see your character's attributes improve greatly during the course of play. As you gain levels, the character's strength and ability will increase, allowing you to have an easier time with the monsters you come across. All of the weapons and armor that you can equip have a certain durability which can be increased by leveling up. The quality of the weapon and armor can even affect how much damage will be dealt when it is used in combat. A new and unique aspect of the game is that all of the characters are created as a result of a final decision that is made by the player. You can choose to go with a preset character, or you can have a custom made character created for you. As a result, you can expect the player's character to look very different than other characters in the game. For example, my character was created with long dark hair and white eyes bff6bb2d33
